SpeedSearch

THE FUTURE OF UNIVERSITY RESEARCH DISCOVERY

Find the Right Research. Faster.

SpeedSearch matches students with professors and research opportunities based on contextual fit — not outdated department pages or cold emails.

THE PROBLEM

Research Discovery Is Broken

Universities invest billions in research, but connecting the right students with the right professors still relies on luck and outdated tools.

Outdated University Pages

Research opportunity listings are buried in static department websites that are rarely updated.

Cold Emailing Professors

Students send dozens of emails with no idea if a professor has openings, wasting everyone's time.

No Contextual Matching

Edit with Lovable

A professor needing a student with media model expertise has no way to find them — and vice versa.

Missed Opportunities

Great research collaborations never happen because the right people simply don't find each other.

HOW IT WORKS

Simple for Everyone

STEP 01

Professors Post Opportunities

Faculty list open positions, ongoing projects, and specific skill needs — from lab assistants to niche domain expertise.

Edit with Lovable

STEP 02

Smart Contextual Matching

SpeedSearch goes beyond keywords. Need a student who understands media models for your AI project? We find them based on coursework, skills, and interests.

STEP 03

Connect & Collaborate

Students and professors connect through the platform. No cold emails, no guesswork — just the right fit, faster.

FOR UNIVERSITY LEADERSHIP

Built for Provosts, Deans & Research Administrators

SpeedSearch is sold to universities as a platform — empowering your institution to maximize research potential.

Edit with Lovable

Increase Research Output

Match the right students to the right projects, accelerating research timelines.

FERPA Compliant

Built with student data privacy and regulatory audit trails at its core.

Equitable Access

Transparent, algorithm-driven matching ensures every student gets a fair chance.

Analytics & Insights

Track research engagement, matching success rates, and faculty utilization.
